- Hotspot
- View more

Wondering about how to add interactivity to your pages and engage users in working with the content? Synergeer featuring over 2 dozens of multifunctional plugins that are altogether meant to drastically enhance your website's performance.

How to install Synergeer theme

Engine installation

Synergeer theme is built as a WordPress theme, so you need to have **WordPress installed** first. You can check a step by step installation [instruction](#).

Theme installation

To upload the theme on WordPress go to the Dashboard, find **Appearance** tab, and go to the **Themes** section. Click on the **Add New** button to continue. Drag-n-drop the theme archive to the special field and click on **Install Now**. Activate the theme in the appeared window.

*SOS - Stylesheet is missing

The error means that you are uploading the wrong zip. Firstly, you should unzip the template package (1519369-1603448827500_67951.zip). This can be done with any archive manager like **WinZip** (PC), **StuffitExpander** (MAC), etc.

After that, navigate to **main_files** folder and **themes**. Upload **synergeer.zip** under **Appearance** -> **themes** tab. Once the theme has been activated you will be suggested to install the **Jet Plugin Wizard**. To continue plugins and demo contents installation with **Wizard** just hit **Begin installing plugin link**. You will be transferred to the page where you can select the needed plugins.

Then please click on the **Install** button.

After **Jet Plugin Wizard** has been successfully installed and activated click on **Return** to the **Dashboard** link in the appeared window.

Plugins Installation

After installation and activation of **Jet Plugin Wizard**, you will get a notice which offers you to continue the plugins and demo contents installation with **Jet Plugin Wizard**. Then click on **START INSTALL** on the top of the page to start the installation of the recommended plugins.

On the **Wizard Home** page, you can check if your server configurations meet WordPress minimal requirements. If any does not meet you can continue the installation process, but it will take more time and can drive to bugs.

If your server configurations meet WordPress minimal requirements please click on **NEXT** link.

Then you have to click on the **START INSTALL** button. Also, you can view the demo.

Pick the plugins you want to install and click on **Next** or **Skip to Demo Content** step if you don't need to install any of these plugins.

Green Install Plugin box means the installation process has been successfully completed.

Sample data installation

After plugins installation, you will get a notice which offers to **Append demo content** to your existing content, **Replace your existing content** with demo content (that means to completely rewrite it), or **Skip demo content** installation. When you have taken the option please click on **NEXT**. PAY ATTENTION! If you select **Replace my existing content** with demo content your whole content will be completely and irreversibly deleted!

When the theme has been installed you will see the **Congratulations window**. You can view your new website or start editing it right now!

Plugins

Inside the **Synergeer theme**, there are lots of built-in plugins that help you build a powerful website. Meet the pack of pre-installed WordPress tools and learn about their possibilities.

Jet Data Importer

This plugin will help you export posts, comments, widgets, settings, etc., from one site to another. With a single click of a button, the plugin generates an **XML file** that can be imported to another website. After the installation, the plugin adds a new block – Demo Content where you can export or import the content.

Elementor Page Builder

Elementor is the ultimate & free WordPress page builder, that lets you create beautiful WordPress websites in the easiest and quickest way possible. Elementor is the first, and currently the only frontend page builder to offer limitless design possibilities. It includes dozens of useful widgets, a stunningly designed template library, a unique mobile editing toolset, and a visual revision history feature.

Jet Theme Core

Jet Theme Core addition for Elementor allows you to simply add the premade layouts to the pages. With its help, you can create your own website parts or sections in a few clicks. And also you can assign various **headers/footers** for certain pages of the one website.

Jet Tabs

Get the opportunity to make the website look more alive by means of the **JetTabs plugin**. In light of this, use the multiple accordions for showcasing the images or FAQ on the pages of your website. Explore the functions of tabs and easy-to-use switcher that can represent your services. Simple and clear, but how robust!

JetElements

There are **40+ widgets** included, everything from building galleries and sliders to infographics is carefully thought through. That function lets you create a page that looks more alive and covers most of the essential users' needs.

JetBlocks

The theme provides you with the possibility to build unique headers and footers. With the help of **JetBlocks plugin** inside you receive the chance to enrich them with such widgets as the registration form, login form, site logo, or search. Actually, it enables you to stick any section in Elementor you want.

JetTricks

JetTricks plugin is extremely easy to use, and you won't need JS to add effects. You can vary any of the pages on the website with the visual effects in a few simple clicks. Live up your site through the hotspots, parallax effect, particles, or satellite. They add the spirit of variety and open the bulk of chances without any line of code.

Jet Smart Filters

JetSmartFilters is a plugin that adds easy-to-use AJAX filters to the pages built with Elementor which contain the dynamic listing. This plugin provides seven different widgets for applying filters. They allow users to find the exact post or product. The important tool for your listings or product grids, different filter types – all in one plugin that will enrich your website.

Filters or Categories do not work?

1. Go to **Crocoblock -> Jet Plugins Settings -> Jet Smart Filters** and turn off all options except JetWooBuilder Products Grid.

2. Go to your Shop template and turn on **Use Current Query Option** in **Products Grid** widget.

WooCommerce

WooCommerce is a plugin that integrates easily with your existing WordPress site, turning your site into a fully functional WordPress e-commerce website with just a few clicks. It helps you sell products and services from your WordPress site. It's a free WordPress plugin with additional features available as extensions.

Jet Woo Builder

JetWoobuilder is a modern plugin, which was made for online projects based on WP and Elementor. It was designed and featured for eCommerce purposes. It's a perfect tool to set up a stylish web store quickly and effortlessly and suits any website which has shop function.

Jet Woo Product Gallery

This is a plugin with 4 gallery widgets, providing an ultimate toolkit for creating Single product galleries. There are such widgets as **Gallery Anchor Navigation**, **Gallery Grid**, **Gallery Modern**, and **Gallery Slider**. Each one is unique and gets you one more step closer to create more bright and persuasive content for your WooCommerce products.

JetMenu

One of the most functional plugins that you can meet inside is **JetMenu**. In case, your website is extremely full of the content, build the menu that will have content within the mega menu items. Add a Google map, contact form, or latest news. It's possible to extend the **Mega Menu** with any of the necessary widgets. If you want to use it on the mobile phone, be sure, the appearance of the menu will be as outstanding as on the desktop.

How to assign a Mobile Menu?

1. Assign Main Menu under **Appearance -> Menus -> Manage Locations**.

2. Enable Jet Menu and Select Mobile Menu.

3. Choose Mobile Menu in Header template.

Contact Form 7

WordPress **Contact form 7** is one of the most popular plugins for creating lead-generating forms. It is easy to integrate and equally easy to deploy. **Contact Form 7** is even used with themes that have integrated contact forms because those forms do not offer customization and high-level options.

Editing with Elementor builder

With our theme, you will also get a free version of the **Elementor page builder** that will make your editing process like a real treasure. **Elementor** has the fastest, most intuitive editor in WordPress. Simply drag, drop and customize.

Just open the needed page and click **Edit with Elementor** at top.

All you need just click on the needed part and then adjust it in the appeared widget. Do not forget to click on the **Update** button on the left bottom of the page.

How to adjust my header

Open your website, and click on **Edit with Elementor** in the top panel.

As you see from the screenshot, you can locate **header, footer, slides** and **home products template**. Just click on the needed part and it will redirect you to the editing page.

Now, we are trying to edit the header so you need to click **Edit with Elementor -> Header**.

Alternatively, you may reach the **Header** from the WordPress admin panel under **Crocoblock -> Theme Builder**, and choose **Edit with Elementor** option for **Header**.

Either way, you will get to the **header section** content editing. To alter the logo, click on it and replace the default image with your desired one for both regular and Retina screens. If needed, you may also switch the image logo to a text one (the site name or a custom text) or display them both at the same time.

How to adjust my footer

Open your website, and click on **Edit with Elementor** -> **Footer** in the top panel. Then, you can edit all footer parts via **Elementor editor**. Just click on the needed part and edit the content in the left widget.

How to edit my Shop page

Open your Shop page, and click on **Edit with Elementor** → **Shop** in the top panel.

Alternatively, you may reach it from the **WordPress admin panel** under **Crocoblock** → **Woo Page Builder**, and choose **Edit with Elementor** option for **Shop**.

The same way you can reach your **Single product** page for editing.

Customizer

In this block, you can find detailed information on how to customize the theme.

There are two ways to start configuring. First is to navigate to **Appearance > Customize** section. The second way is to press the **Customize** link on the top left of the website.

The left side of the site interface lists the available settings while the page content shows up at the right side of the screen. After adding the changes, you can save them by pressing the **Save & Publish** button.

Below is the list of settings that can be customized according to your needs:

- **Site Identity** – logo, site title, tagline, preloader controls;
- **General Site Settings** – favicon, breadcrumbs, social links, to top button controls;
- **Colors** – allows defining the body background color;
- **Color Scheme** – allows configuring website Color Scheme;
- **Typography** – font design options for body, headings, breadcrumbs, and menu;
- **Background Image** – allows defining body background image;
- **Menus** – allows managing menus and menu items;
- **Widgets** – allows managing widgets;
- **Footer** – copyright text and the rest of the footer design options;
- **Blog Settings** – blog design controls (the settings shows up for the blog page only);
- **Homepage Settings** – choose what's displayed on the front page of your site;
- **Additional CSS** – a section for adding your custom CSS rules.
